

Dear Human Resources Director:

I am the head of the R&D Department. Our primary job is the development of software for logistics. Transport Management System (TMS) is part of our product suite. To enter lower segment of the market the company had decided to find some alternatives for commercial components. The Miqueas's job was to replace commercial map suppliers (e.g. Google Maps) by Open Street Map. He had to build and configure a map server. The final step was to connect the server to the TMS system. The task was completed satisfactorily and on-time.

I have found Miqueas García González to be reliable and accountable person. He has great professional skills and most problems he solved by himself. His communication with other members of the team was very good.

I would like to emphasize the high quality of his work. He provided very good technical documentation of the solution as well.

Miqueas can work in a dynamic environment, committed to organizational development and standard operational procedures. He is a perfect fit as a software engineer or IT engineer.

I recommend him as a complete employee and he would be an advantage to your organization as any other organization will be pleased to have his service.

Robert Dykacz,
Head of the R&D Department,
Quantum Qguar sp z o.o.
